

1. What is the use of following libraries:

1. Requests

- The requests library is used to **send HTTP requests** to websites or web servers.
- It helps us **get data from a website**.

Example:

```
import requests  
response = requests.get("https://example.com")  
print(response.text)
```

2. BeautifulSoup (bs4)

- The bs4 library is used to **parse and extract data from HTML and XML documents**.
- It is commonly used for **web scraping**.

Example:

```
from bs4 import BeautifulSoup  
soup = BeautifulSoup(response.text, "html.parser")  
print(soup.title.text)
```
